

Please don't let the LPFM stations take priority over FM translator service. One of my favorite radio stations could be forced off the air due to such a decision. K-LOVE is the only dependable Christian Radio Station that is available in the Austin area. This radio station is a family friendly option among radio stations that often have rude advertising and music that is not uplifting. The radio station is listened to by many young adults and could make a big difference in their attitudes. It is positive and encouraging throughout the US.
